

**STRUCTURE SCAN MINI  
SERVICES**

Image Your World

## STRUCTURE SCAN MINI

- The StructureScan Mini is GSSI's portable integrated GPR system for concrete inspection.
- This handheld unit is used to locate rebar, conduits, post-tension cables, voids and determine concrete slab thickness.
- With a 1600 MHz antenna, and depth penetration of up to 20 inches (50cm), the StructureScan Mini offers the perfect blend of data resolution and depth. Used worldwide, it has quickly become the standard for concrete imaging.
- Additionally, the StructureScan Mini is available with 2D or 3D capabilities, flexible for your job site needs.

- All-in-One handheld GPR system
- Ergonomic handle and controls
- Easy to use operator interface with color screen display screen
- Survey wheel encoder.
- Guiding laser for locating and 3D surveying.

### Compact Design

The StructureScan Mini makes concrete inspection easy in tight spaces, or above-the-head survey locations

### Integrated Tool

All-in-one concrete inspection tool - antenna, positioning system and control unit combo

### System Flexibility

StructureScan Mini is offered in two versions, a 2D data collection mode for real-time results and a 3D data collection mode for advanced interpretation.

### Durability

Ruggedized plastic casing and wheels for long-lasting performance

### Value

The perfect blend of price and performance, backed by a two-year warranty

## USES

- **Structure inspection**  
monuments, walls, towers, tunnels, balconies, garages, decks.
- **Condition assessment**  
map relative concrete condition for rehab planning.
- **Measure slab thickness**
- **Void location**
